Joseph Letorney
Principal

We, the Class of 1965, dedicate this
yearbook to
Joseph A. Letorney, Principal of Avon
High School,
in appreciation of his enthusiasm for
learning, inspiration
towards excellence, and high regard
for the individual.

*Best of luck for a
successful future -
Joseph A. Letorney*

We pray that God will make
our wills as strong,
our smiles as warm,
our hearts as kind,
our purposes as high,
and our lives as filled with wisdom and respect
as his.

In return for the ambitions and ideals
which he has imparted to us,
may we achieve the success he wishes
for us.

Appreciation

Miss Braden, teacher, counselor, and friend, has guided us through Avon High School with her warm and understanding ways. Constantly encouraging and aiding us in all our endeavors Miss Braden has given us faith in ourselves and our abilities. As a teacher she has instilled new knowledge; as a counselor she has instilled sound values and new ambitions; and as a friend she has instilled the joy of living in us. We can never thank Miss Braden enough.

The objectives and aims of the 1964-65 Student Council included the desire to increase school spirit and to improve the power and effectiveness of the council, giving it more voice in the functioning of school activities.

Citizenship—a quality necessary in every good student, is one of the most important qualifications of a National Honor Society member.

Scholarship—it is extremely important for a National Honor Society member to be able to express their ideas and opinions with force and clarity.

Leadership—a quality each of the National Honor Society members must possess in every sphere of influence.

Service—another very necessary quality of a National Honor Society member. Each member must not only be of service to others but to their school.

Our National Honor Society, in its second full year, has collectively expressed these qualities in many ways. They offer tutoring to any student who requests it; they supervise the highly successful year-round book fair; and co-sponsored an assembly to introduce the student body to the many facets of student life. Not only have they recognized outstanding students, they have become a significant influence in our school life.

The Band

This year saw the band, under the direction of Gilbert Madrigal, assume an important role in school activities. The band could be seen every Friday night at the varsity basketball games. This was also the first year Avon High School had their own majorettes captained by Debbie Weir. We hope every year will see them grow as much as they have this year.

Even if the Glee Club were to do no more they will always be remembered for their magnificent assembly on Veterans Day. We wish Mr. Madrigal, the band, the majorettes, and the glee club continued success.

ALFRED Q. PANTHER

THE CHALLENGE OF CITIZENSHIP

by
Robert T. Peterson

The adoption of the American Constitution by the sparsely settled Western World ushered in a new nation . . . a democratic republic whose faith in the reason and dignity of man confronted the old regime in Europe and, in the years that followed, provided it with the inspiration of a great example.

Storm and stress have visited the land of Washington, Jefferson and Lincoln, but the ship of state has lived through all the tempests. Today the United States of America stands in a position of unrivalled power and leadership among nations of the earth.

The United States just didn't become great, but people like you and me joined hands to help and protect one another. A distinguished succession of leaders has stood at the helm during our national history; great men such as Hamilton, Jefferson, Adams, Franklin, Jackson; just to mention a few.

But a few outstanding leaders didn't form the government of the United States. It was a joint action by the people for the purpose of the American Government. The purpose is expressed in the preamble to the Constitution which states: "We, the People of the United States, in order to form a more perfect Union . . . do ordain and establish this Constitution for the United States of America."

For over a hundred years, one of the most prized possessions in the world has been a certificate, paper, or passport that is evidence of United States citizenship. Driven out by force or fear of an oppressor's might, or simply seeking greater opportunity than they had in their own countries, millions have left their homelands to begin a new life in America.

These immigrants, no matter what race, sex or marital status, pledged an oath that they "will support and defend the Constitution and laws of the United States against all enemies, foreign and domestic, and bear true faith and allegiance to the same."

Those of us born and raised in the United States rarely appreciate the worth of our citizenship unless we have occasion to travel to foreign lands or to learn from refugees what it has meant to them.

It isn't exactly a happy thought that most naturalized citizens know more about our government especially our Constitution, than do those born in this country. Many Americans go through a lifetime

without having read the Declaration of Independence and the Constitution, not realizing how these two great documents have guaranteed to them the rights to "life, liberty, and the pursuit of happiness", and the privilege of living under a "government of the people, by the people and for the people". The Constitution is the original rule book for the game of American Citizenship. Like baseball, football, or basketball rule books, it has grown and changed to keep up with new ideas and improved ways of doing things.

One of the few drawbacks of our government is the cost of government services. There is a price on everything that the government does for us that we must pay for in taxes, or in government debts that make our whole economic life less secure. While most of the increased cost is due to the needs of national defense and foreign aid in these years of "cold" and "hot" war, the costs of non-military services have risen sharply, too.

The late great Albert Einstein once admitted that figuring out his United States income tax was beyond him—he had to go to a tax consultant. "This is too difficult for a mathematician," said Einstein. "It takes a philosopher." Most U.S. taxpayers are baffled, too, by the intricacies of the income tax. When they send off their returns, conscientious taxpayers can never be really sure whether they cheated themselves or their government.

None of what has been said here is intended to suggest that our government is extravagant or is performing any services it shouldn't. The point is, though, that these services we urge our government to give us take money out of our pockets, and that we should think about this before we add voice to those who seek MORE government services.

Democracy operated on the principle that fair goals can and must be gained by fair methods for all people. The founders of our country decided that our form of government should be that of a republic or representative democracy. In a representative democracy the people govern themselves, but they do so by entrusting the entire administration of the state to their representatives whom they choose for that purpose.

To borrow Daniel Webster's famous words, I would like to end by saying, "Liberty and Union, now and forever, one and inseparable."
